

SENSORY MAPPING

Map your senses: where were you when you noticed....?

Describe a time and place when you found a new texture outside?

Describe a time and place when you saw something that surprised you?

Think back to your time at Outdoor School. You used your senses to experience the environment around you.

Describe a time and place when you tasted something that you had never tasted before?

Describe a time and place when you noticed a smell that was new to you?
